Management Message

At PESITRO, we engineer confidence through clinical precision. Our legacy of 15+ years in advanced dental manufacturing empowers professionals with evidence-based oral care solutions that transform daily routines into exceptional patient experiences.

We take pride in every product bearing the PESITRO name - each represents our commitment to clinical excellence, patient safety, and sustainable innovation.

As we expand across global markets, our vision remains clear: To make clinical-grade oral care accessible, effective, and beautifully designed for every patient profile.

**Management Team,
PESITRO Global**

About PESITRO

Clinical Excellence in Oral Care

PESITRO represents the convergence of precision engineering and clinical-grade oral care innovation. For over 15 years, our advanced manufacturing facilities have delivered professionally-trusted solutions meeting ISO 13485, CE, and FDA standards.

Global Clinical Presence

With established operations across Europe, USA, and China, and a growing distribution network throughout the GCC region, PESITRO has evolved into a truly global clinical oral care brand. Our collaborations with healthcare professionals, clinics, and research institutions ensure consistent access to world-class products designed for diverse clinical needs and patient lifestyles.

Manufacturing & Quality Assurance

Our 33,000 m² certified manufacturing facility combines precision engineering with advanced medical compliance. Each production stage, from raw material selection to final packaging, is governed by international quality systems ensuring durability, safety, and clinical reliability.

Brand Philosophy

The PESITRO Clinical Standard: Precision Care, Proven Results. Our philosophy balances therapeutic efficacy with patient comfort, ensuring every product delivers professional results with exceptional user experience. We call this approach "Clinical Precision" - the perfect balance between evidence-based performance and gentle care.

Sustainable Clinical Practice

PESITRO is committed to responsible manufacturing and environmental stewardship. Our eco-friendly initiatives include recyclable packaging, biodegradable materials, and energy-efficient production processes. We partner with dental institutions to promote sustainable clinical practices and environmental awareness throughout the oral care ecosystem.

Why PESITRO?

Advanced Oral Care Technology

1

Powered by UltraX™ Clinical-Grade Bristles engineered for superior plaque removal, low water absorption, and bacteria-resistant performance — ensuring safer, cleaner brushing every day.

Proven Manufacturing Excellence:

2

With over 15 years of dental manufacturing expertise, PESITRO operates an ISO 13485 certified facility spanning 33,000 m², delivering precision-engineered oral care products at global standards.

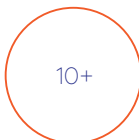

Clinically Trusted Performance:

3

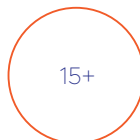

Developed in collaboration with international dental experts and trusted by professionals worldwide, PESITRO delivers clinic-level performance at accessible pricing.

Brand Strength & Recognition

PESITRO stands as a symbol of innovation and trust. With presence in over 30 countries, the brand is recognized for its design excellence and clinical reliability. Our participation in AEEDC Dubai, IDS Cologne, and other global dental exhibitions underscores our commitment to excellence, collaboration, and continued innovation.

Future Outlook & Vision 2030

Looking ahead, PESITRO is driven by a single vision: to redefine professional oral care with innovation that blends technology and empathy. Our goal is to be among the top five global oral care brands by 2030, supported by sustainability, smart design, and a global network of trusted professionals.

ADULT TOOTHBRUSHES

The Science Behind PESITRO UltraX Bristles

Developed in collaboration with dental experts across multiple countries, PESITRO UltraX bristles represent a new generation of oral care technology. Each toothbrush is engineered to provide exceptional plaque removal while maintaining maximum gentleness on teeth and gums.

What Makes UltraX Bristles Unique ?

Unlike standard nylon bristles, UltraX™ filaments are made from a special high-performance polyester. This material is finer, softer, and significantly less water-absorbent (UltraX™ 0.20% vs. Nylon 3.00%). The result is a bristle that remains dry, hygienic, and stable in shape, reducing bacterial buildup one of the leading causes of oral diseases.

Scientific Advantages

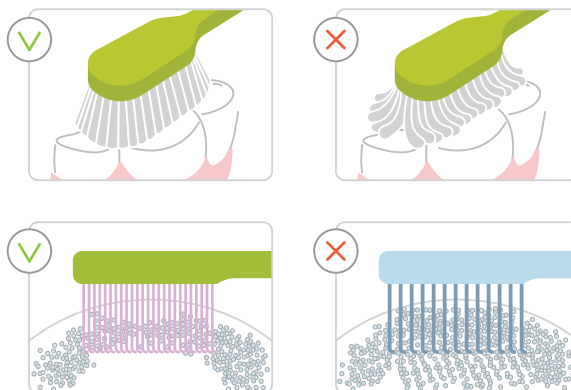

93.3% Lower Water Absorption: UltraX™ bristles absorb dramatically less moisture than conventional nylon, minimizing bacterial growth and odor retention.

The Benefits of PESITRO Toothbrushes

Ultra-Fine and Densely Packed Filaments: High-density filament clusters deliver gentle yet thorough plaque removal without damaging enamel or irritating gums.

Advanced End-Rounding: Each filament is precisely rounded to ensure smooth contact with enamel and gingival tissue, preventing microabrasions.

Superior Flexibility and Reach: The fine, elastic structure of UltraX bristles allows them to conform to tooth contours and access hard-to-reach areas for optimal cleaning efficiency.

Clinical Insight

The UltraX™ technology combines gentleness and precision, making it ideal for individuals with sensitive gums, exposed roots, or post-procedure care needs. It represents a balance between engineering innovation and professional oral health expertise, ensuring a safe, effective, and comfortable brushing experience.

The PESITRO UltraClean 3980 Super Soft toothbrush is engineered for individuals with healthy gums and normal oral conditions who desire gentle yet effective daily cleaning.

Featuring 3980 Ultra-X™ filaments (0.12 mm) and an ergonomic 45° angled head, it provides optimal plaque removal while maintaining gum comfort making it ideal for everyday dental care and prevention of calculus or staining.

Recommended for patients with healthy gums prone to surface staining or plaque accumulation, this toothbrush delivers a balance of softness and strength for optimal daily hygiene.

TRAVEL

ESSENTIAL CARE.
ANYWHERE.

The PESITRO Travel Kit is your complete on-the-go oral hygiene solution — compact, hygienic, and professionally designed for travelers, dental patients, and professionals on the move. Every component reflects PESITRO's signature innovation, premium quality, and ergonomic design.

Kit Includes

• **UltraClean 6580 Travel Toothbrush**

Foldable handle design for portability.

Equipped with 6580 UltraSoft bristles (0.10 mm) for gentle yet effective cleaning.

Compact head ensures deep reach while protecting enamel and gums

• **PESITRO PURE SMILE Toothpaste (10g)**

Enriched with mint for freshness and formulated for gentle, daily care.

Fluoride-based protection and enamel-safe polishing agents maintain oral health even during travel.

• **PESITRO UHMWPE Dental Floss (10 m)**

Made from ultra-durable UHMWPE fiber — the same material used in bulletproof vests — it resists shredding even in tight contacts for effortless plaque removal.

• **Interdental Brushes (2 pcs – I-Type)**

Sizes ISO 2 (0.9 mm) and ISO 4 (1.3 mm), featuring antibacterial bristles and plastic-coated safety wire for precise cleaning between teeth.

FLOSSES

A Key Tool for Oral Health

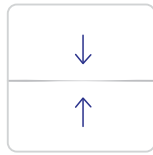

Daily cleaning between teeth is essential for preventing plaque build-up, gum inflammation, and long-term oral complications. PESITRO offers a complete, professionally developed floss portfolio designed to meet every clinical need — from sensitive gums to orthodontics and implant care.

Types of flosses

Our flosses are engineered with advanced materials such as PTFE, UHMWPE, expanding fibers, super-soft microfilaments, and specialized 3-in-1 orthodontic designs. Each type delivers smooth gliding, effective plaque removal, and a gentle feel even for the most delicate gum conditions.

Why PESITRO Flosses?

Because we provide multiple textures, thickness options, and performance levels, PESITRO provides dental professionals and consumers with a reliable, high-quality solution for every case.

Clinical Effectiveness

Clinical studies show that PESITRO adaptive floss:

- Removes up to 2x more plaque than traditional floss.
- Improves biofilm disruption, supporting better oral health.
- Accesses subgingival areas, reducing the risk of inflammatory processes.

PESITRO®

Advance Ultra Floss

PESITRO Advance Ultra Floss is a purpose-designer solution for effective oral hygiene around orthodontics, bridges, and implants. Its unique two-part design features a stiff end for easy insertion from two sides, a standard spongy floss that expands to trap plaque. This smart design ensures thorough plaque removal while secures prosthetic and orthodontic work.

ELECTRIC

The PESITRO PULSE transcends conventional brushing by utilizing high-frequency sonic vibrations (44,000-60,000 pulses per minute) to provide a dual-action cleaning effect. This approach combines direct mechanical scrubbing with powerful hydrodynamic forces to remove plaque biofilm from surfaces both directly accessible and beyond the reach of the bristles.

High-frequency bristle tips provide effective mechanical cleaning, while sonic vibrations create micro-bubbles and fluid movement that penetrate 4–5 mm beyond the bristle tips to disrupt plaque in hard-to-reach areas. The Gentle head is ideal for sensitive gums, the Power head offers deep daily cleaning, and the Target head ensures daily precision around implants, orthodontic brackets, and crowded teeth.

The PESITRO Hydro Floss is an oral irrigator designed to provide precise, powerful, and personalized cleaning for individuals and families. With an adjustable pressure of 40–130 PSI and six specialized nozzles, it effectively removes debris and disrupts plaque from interdental spaces, orthodontic appliances, and periodontal pockets.

The PESITRO Hydro Floss offers 5 smart modes (Strong, Normal, Soft, Pulse, Child) for personalized cleaning—from gentle care for children and sensitive gums to powerful pulsed irrigation for periodontal maintenance. Its nozzle system includes 3 Standard nozzles, an Ortho nozzle for braces, a Perio nozzle for deep pockets up to 6 mm, and an Antiplaque nozzle. Family-friendly design allows marking nozzles for hygiene, while silent operation and durable ABS materials ensure safe, comfortable use. Set includes the Hydro Floss unit, 6 nozzles, and a travel case.

The Smart Way To Clean Orthodontic Appliances

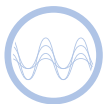

This advanced ultrasonic cleaner combines high-frequency ultrasonic waves with powerful UV sterilization to provide crystal cleaning ability. Designed for daily use, it effortlessly removes biofilm, stains, and bacteria from a wide range of dental appliances including Denture, Aligners, Retainers, ensuring they are not just visually clean, but hygienically pristine.

The PESITRO Ultrasonic Cleaner uses Advanced UltraWave Technology, generating high-frequency ultrasonic waves that create millions of microscopic bubbles to remove 99.9% of plaque, bacteria, and food particles from every contour and crevice. Its dual-action cleaning combines ultrasonic waves with strong UV sterilization to neutralize microorganisms, ensuring a thorough and safe clean. Gentle yet powerful, it is safe for all appliances, preserving aligners, retainers, dentures, and other delicate materials. The large, clear tank easily accommodates full dentures, multiple aligners, mouthguards, and other large oral appliances.
