PREMIUM ALGINATE SYSTEM

THE BEST ALGINATES IN THE WORLD

Proven by facts, stated by dentists

YOUR IMPRESSION IS OUR SPECIALTY

YOUR IMPRESSION IS OUR SPECIALTY

ABOUT US

Since 1908, Cavex has been developing and manufacturing premium solutions for the dental industry. Right from the start, all the company's operations have been performed in-house in Haarlem, The Netherlands. Every new Cavex product is a result of intensive collaboration between R&D, Regulatory, Production, Marketing, Sales and Logistics. This enables Cavex to develop, produce and distribute high-quality products all over the world.

MANUFACTURER FOR DENTAL PROFESSIONALS SINCE 1908

With Haarlem as its permanent home base, Cavex has been inventing and manufacturing innovative solutions within the dental industry since 1908. We have been known as a manufacturer of top products with guaranteed quality from the offset. Find out how Cavex' story began when two ambitious Haarlem pharmacists laid the foundations for one of the largest dental product manufacturers in the world.

HAARLEM BASED PHARMACISTS KEUR & SNETJES

Back in 1908, there was one single solution to dental problems: extraction. The Haarlem pharmacists Keur and Sneltsjes were convinced that extraction could be made a lot more pleasant for patients under local anesthesia. Hence the first product for dentistry was born: Selectocaine anesthetic fluid.

'CAVEX SILVER AMALGAM'

Over time and due to the increasing availability of dental materials, the goal of treatment shifted from 'extraction' to 'conservation and restoration'. The established dental product company Keur & Sneltsjes developed a revolutionary filler based on amalgam. As tooth decay (cavity) now belonged to the past (ex), the name

Cavex was born. Later, the company split into two brands: 'Keur & Sneltsjes' and 'Cavex Holland'.

YOUR IMPRESSION IS OUR SPECIALTY

Today, we have grown to become a leading manufacturer in the world of dental products. We help dental professionals to optimize daily performance by supplying them reliable, top quality products.

In addition to supporting dental professionals globally, Cavex offers consumers effective and safe home-solutions in the field of halitosis and whitening. Stating that 'Your Impression Is Our Specialty', our dental products also enable consumers to always make a perfect impression. Ever since the introduction of the CA37 alginate, the golden combination of human determination and professional perfectionism has transformed us into a benchmark in several areas in the field of dentistry.

THE POWER OF COLLABORATION

We are in close contact with dentists, universities and opinion leaders to develop new products, but also to perfect existing products. In this way Cavex remains a leader in the dental industry and we continue to be able to support dental professionals worldwide in their daily work.

CAVEX' SECRET

Our experienced team of well-trained people has always been the key to our success. As the world of dentistry is changing rapidly, our professionals adapt just as quickly – if not faster. We maintain close partnerships with dealers all over the world, providing them the best products and support with promotions and product trainings. To keep thriving in the field of innovative product development and optimize our product line, we are closely connected to dentists, universities, and opinion leaders. This is how we maintain our leader status in dentistry and how we continue to be able to support dental professionals worldwide in their daily work.

We value the opinion of the dentist. That's why we let The Dental Advisor regularly test our products. After clinical evaluations by a large team of dentists, the tested products receive a score of up to five pluses. Several Cavex products, including Cavex Cream Alginate, Cavex ColorChange and the Cavex Bite&White ABC Masterkit, received very high ratings. Cavex Cream even achieved the title 'Top Award Winner' for several years in a row.

CAVEX CREAM ALGINATE

Cavex Cream Alginate is the latest addition to the Cavex alginate range. Due to a combination of 5 µm accuracy, high tear strength and excellent elasticity, the properties of this dental impression material challenge those of silicone quality. Add extremely rapid water absorption, a user-friendly creamy consistency during mixing, snap-set, and five-year shelf life. Cavex Cream Alginate is an unrivaled alginate.

This alginate impression comes with a beyond pleasant bubble-gum scent to sink one's teeth into, hence avoiding patient bite resistance. Cavex Cream Alginate is available in Normal (90 sec.) and Fast Set (60 sec.).

Features

- Detail reproduction of at least 5 µm
- Easy mixing
- Highly elastic
- High tear strength

Art. Nr.	Description	Content
AA600	Cavex Cream Alginate NS	20 x 500 gr
AA605	Cavex Cream Alginate FS	20 x 500 gr

CAVEX COLORCHANGE

User-friendly impression material with virtual intelligence: Cavex ColorChange. This product belongs to the latest generation of Cavex alginates. Color changes indicate different procedural stages.

Does the alginate's color change from violet to pink? Mixing time is over. Does the alginate change from pink to white as the impression is taken? The alginate has hardened, and the impression tray can be removed from the patient's mouth. After thirty minutes, the completely cured alginate turns pink again.

Features

- Indicates three color changes
- Short setting time
- Highly elastic
- Maximum compatibility with plaster

Art. Nr.	Description	Content
AA323	Cavex ColorChange	20 x 500 gr

CAVEX IMPRESSIONAL

Cavex Impressional enables you to take alginate impressions down to the last detail. The alginate has a unique combination of very high elasticity, tear strength, and detail reproduction (25 µm). Consequently, this alginate product is very suitable for working around metal frames and/or deep undercuts.

Cavex Impressional is available in Normal (90 sec.) and Fast Set (60 sec.). Due to the combination of fast setting and a pleasant spearmint aroma, patients enjoy more pleasant procedures.

Features

- Maximum elasticity and tear strength
- Clearly legible blue color
- Ideal for the alginate hydrocolloid technique
- Optimal gypsum compatibility

Art. Nr.	Description	Content
AA096	Cavex Impressional NS	20 x 500 gr
AA097	Cavex Impressional FS	20 x 500 gr

CAVEX ORTHOTRACE

Cavex Orthotrace is an orthodontic alginate impression material with a natural fruit scent. The product has been developed based on the needs of orthodontists specifically. Additionally, Cavex Orthotrace contains many features that provide patients with a more pleasant procedure.

Due to reduced setting time, Cavex Orthotrace alginate does not get into the back of the mouth. Hence, by using Cavex Orthotrace a gag reflex in patients is

avoided. Moreover, the combination of pleasant scent and color invites one to sink one's teeth into the impression material.

Features

- Extra fast setting
- Pleasant fruit aroma
- Highly elastic
- Clearly legible pink color

Art. Nr.	Description	Content
AA380	Cavex Orthotrace	20 x 500 gr

CAVEX ALGINATE MIXER II

Improve impression results with perfectly mixed alginate at the touch of a button: Cavex Alginate Mixer II. Mixing alginate into a smooth paste requires a lot of experience. The user's mixing skills influence the texture, consistency, and hence the quality of the alginate mix. Less accurately mixed alginates result in less accurate dental impressions.

The Cavex Alginate Mixer II enhances dental impression performance by standardizing

the alginate mixing procedure and eliminating even the slightest occasional imperfections. Consequently, dental professionals are assured of a smooth and homogeneous mixture, free of lumps or air bubbles. Time after time.

Features

- Hygienic
- User friendly
- Easy to clean
- More accurate impression

Art. Nr. Description

	Cavex Alginate Mixer II, 4 x mixing cup, spatula, mixingrod, water dosing bottle, accessory holder
AT520	Incl. 10 x 500 gr Cavex Cream NS

CAVEX ALGINATE ACCESSORIES

Various external factors can influence the quality of alginate impressions. This includes the water temperature, mixing ratio, mixing technique and storage conditions. Cavex has developed various alginate accessories to optimize and standardize these external factors. With our alginate accessories, you can always rely on a perfect alginate impression. The following accessories are available:

- The alginate container for controlled storage and exact dosing of the alginate powder
- The water dosing bottle for a controlled, constant water temperature and exact dosing of the water
- The flexible mixing bowl with mixing spatula

Art. Nr.	Description	Content
AT021	Cavex water dosing bottle	1 pce
AT041	Cavex mixing bowl blue	1 pce
AT042	Cavex mixing spatula, plastic	1 pce
AT040/043	Cavex plastic container (box + lid)	1 pce

AT240	Cavex alginate container blue	1 pce
AT260	Cavex alginate container pink	1 pce

CAVEX IMPRESAFE

Hygiene and sterilization are essential in dental clinics and laboratories. That is why Cavex developed a fast, safe, and highly effective dental impression disinfectant: Cavex ImpreSafe.

In just three minutes, this revolutionary disinfectant liquid kills a minimum of 99.99% of all bacteria, fungi, and viruses, including the coronavirus. The complete system for dental clinics contains:

- A disinfection container
- One liter of disinfection concentrate
- A digital timer
- 50 zip lock bags

Features

- Quick and efficient
- Concentrated
- Aldehyde free
- Complete system
- Reliable and secure
- Pleasant smell

Art. Nr.	Description	Content
HA053	Cavex ImpreSafe Starterkit Cavex ImpreSafe 1000 ml. Container, Timer, 50 plastic bags	1 pce
	Refill Cavex ImpreSafe	1 x 1000 ml
HA050	Cavex ImpreSafe Refill pack	6 x 1000 ml
HT020	Cavex ImpreSafe Container	1 pce
HT025	Cavex ImpreSafe plastic bags	60 x 50 pcs

CAVEX GREENCLEAN

Quickly and easily remove alginate and gypsum residues with Cavex GreenClean. Who would be better to produce an alginate dissolver than the makers of "The Best Alginates in the World"?

Cavex GreenClean is a smart solution for cleaning dental impression trays, instruments, and other accessories. Not by scratching or sanding, but simply by dissolving alginate and gypsum residues. Simply submerge for

15-30 minutes, rinse under running water and the sparkling clean impression tray is ready for use.

Features

- pH neutral
- Skin-friendly
- Biodegradable
- 1 kg> 500 clean impression trays
- Refreshing smell

Art. Nr.	Description	Content
HA001	Cavex GreenClean jar	1 kg

CAVEX BITE&WHITE ABC MASTERKIT

Cavex offers the only three-step whitening solution for safe, effective, and above all, pain-free teeth whitening: The Cavex Bite&White ABC Masterkit.

As the syringes are packed in a separate tray there is no need to refrigerate the entire kit. Furthermore, the 3 x 3 ml whitening gel is sufficient for a 15-day treatment. Does it take less than 15 days for the patient to be satisfied? The resealable syringes can be used for a touch-up later.

Activate with StainLess

Clean the teeth thoroughly with Cavex Bite&White StainLess. Other than cleaning the teeth, this paste raises oral acidity levels and optimizes the whitening gel's performance.

Whitening with Bite&White whitening gel

Keep the whitening tray with whitening gel in the mouth for 30 to 60 minutes to achieve

optimal whitening results quickly and safely. Cavex whitening gel has been proven to be effective.

Conditioning with ExSense

After whitening, Cavex Bite&White ExSense provides essential aftercare. The whitening tray with this conditioning gel is kept in the mouth for 5-10 minutes. ExSense helps teeth feel more comfortable and provides long-lasting care thanks to the addition of 2% hydroxyapatite.

Features

- A complete whitening treatment under dentist-supervision
- Maximal results, minimal sensitivity
- Professional packaging with clear instructions
- Additional video instructions available on YouTube
- 3 x 3 ml whitening gel for a 15-day treatment

Art. Nr.	Description	Content
BW090	Cavex Bite&White ABC Masterkit Cavex Bite&White StainLess, tube Cavex Bite&White 3 syringes CP16 Cavex Bite&White ExSense, tube tray cassette, shade guide and instruction manual	1 x 35 ml / 50 gr 3 x 3 ml 1 x 42 ml / 50 gr
BW010	Cavex Bite&White Refill	1 x 3 ml
BW015	Cavex Bite&White bulk Refill Pack	10 x 3 ml

CAVEX HEALTHYPOPS

Cherry flavored lollipops that moisten a dry mouth and provide a fresh, comfortable feeling.

A dry mouth can have various causes, such as not drinking enough, smoking, mouth breathing, medication use, hormonal changes, aging, or certain conditions. Medical treatments, such as chemotherapy or radiation in the head and neck area, can also damage the salivary glands and reduce saliva production.

Cavex Healthypops are specially developed with carefully selected ingredients that help moisten the mouth and thus contribute to a

pleasant and refreshing feeling.

Betaine: Binds moisture and supports saliva production for a hydrating mouthfeel.

Xylitol: Natural sweetener that helps prevent tooth decay and stimulates saliva.

Erythritol: Reduces plaque formation and protects enamel because it is non-fermentable.

Features

- Cherry flavor
- Moistens a dry mouth
- Contains no sugar, gluten, dairy, soy, nuts, artificial flavors or fragrances

Art. Nr.	Description	Content
BW900	Cavex Healthypops Cherry	60 x Lollipop (454 gr)

CAVEX RUSH BRUSH

The Cavex Rush Brush allows patients to brush their teeth easily and quickly before dental treatment or on the go. The toothbrush is immediately ready for use and no toothpaste is needed. The brush is invisibly coated with fresh, fluoride-free toothpaste.

The small brush head reaches every area in the mouth and the soft, rounded bristles are safe for the gums. Also, the toothbrush is packaged in a individual wrapper.

This makes the brush easy to take anywhere while maintaining optimal hygiene.

Features

- Impregnated with toothpaste
- Hygienic packaging
- On-the-go solution
- Fresh mint flavor
- Soft brush
- Small brush head for optimal precision

Art. Nr.	Description	Content
HA090	Cavex Rush Brush 100 pieces per box (red, green, yellow and blue 25 of each)	10 x 100 pcs

CAVEX BOIL&BITE

Cavex Boil&Bite is a double-sided thermoplastic tray for the treatment of tooth sensitivity. This dental tray is an upper and lower tray in one and can be used for different purposes. The revolutionary tray is well tolerated hence suitable for everyone!

The Cavex Boil&Bite can be easily used by both dentists and patients. Consequently, Cavex Boil&Bite is can be used for treatment in dental clinics and use at home.

Features

- Perfect match with Cavex ExSense
- For use in dental clinic as well as at home
- One box contains eight mouthguards

Art. Nr.	Description	Content
BW085	Cavex Boil&Bite	8 pcs

CAVEX SET UP WAX

Cavex Set Up Wax is a top-shelf modeling wax. The wax is available in Soft, Regular, Hard, and Extra Hard. Processing is identical but melting points and carving wax hardness vary. In addition to these variants, the wax is now available in Regular Flex. This dental wax is characterized by extra heat transition flexibility, offering technicians a Cavex Set-Up Wax that perfectly matches the processing of the wax.

Set Up wax plates are large and usually sufficient for two prostheses. In addition to setting up the bite wall, Cavex dental wax adheres well to the spoon and is therefore

also used as a boxing wax. Due to its ideal consistency, this wax is one of the top material choices for bite registration in dental clinics. A prosthesis must both be beautiful and fit perfectly. To that end, Cavex Set Up Wax holds flow when molded by the dental technician and can be processed as desired.

Features

- For complete and partial dentures
- Low casting shrinkage
- Dimensionally stable
- Elastic, holds the flow
- Modeling and boxing wax

Art. Nr.	Description	Content
WA004	Cavex Set Up Soft 500 gr, 23 sheets	500 gr
WA005	Cavex Set Up Regular 500 gr, 23 sheets	500 gr
WA002	Cavex Set Up Regular Flex 500 gr, 23 sheets	500 gr
WA006	Cavex Set Up Hard 500 gr, 23 sheets	500 gr
WA008	Cavex Set Up Extra Hard 500 gr, 23 sheets	500 gr
WA015	Cavex Set Up Regular 2500 gr, 115 sheets	2500 gr
WA016	Cavex Set Up Hard 2500 gr, 115 sheets	2500 gr

CAVEX YELLOW WAX

Cavex Yellow Wax is a softer dental wax and even easier to mold. Perfect for eliminating undercuts and adjusting the edges of impression trays.

Features

- For adjustment to impression trays
- Blocking out undercuts
- Flexible, easy to mold
- Cost-efficient
- Five-year shelf life

Art. Nr.	Description	Content
WB006	Cavex Yellow Wax	17 sheets

CAVEX BASEPLATES

Cavex Baseplates are the most reliable basis for a perfectly fitting prosthesis. Shellac is one of the natural components of the product. Years of technological perfection within Cavex have led to the possibility to form an extremely stable three-dimensional model from a two-dimensional plate.

After a short heat-through in the flame, the pink plate with a standard thickness of 1.4 mm can easily be molded onto the gypsum model. Furthermore, the user-friendly Cavex Baseplates are easy to cut.

The Mica-free version further improves the performance of the Cavex Dental

Baseplates. Aluminum hydroxide ensures the release of cooling crystal water once temperatures exceed 200°C, preventing burning of the plate. Additionally, the result is smoother, non-porous, and shiny, exactly like the prosthetic plastic will turn out.

Features

- Laboratory material for prosthesis manufacturing
- Simple technique
- Strong with high dimensional stability
- Standardizes thickness
- No deformation at mouth temperature
- Packed per 100 pieces
- Mica-free baseplates available

Art. Nr.	Description	Content
BP004	Cavex Baseplates uppers	100 pcs
BP054	Cavex Baseplates lowers	100 pcs
BP024	Cavex Baseplates uppers, double thickness 2.70 - 2.80 mm	50 pcs
BP005	Cavex Baseplates mica-free uppers	100 pcs
BP055	Cavex Baseplates mica-free lowers	100 pcs

CAVEX LC DENTAL TRAY

Cavex Dental Trays have been used for many years in dental laboratories all over the world to make well-fitting impression trays. We differentiate between Cavex LC Dental Tray and Cavex Individual Tray.

The Cavex Light Curing Dental Tray is a light-curing synthetic resin spoon plate for creating individual or functional impression trays. The material is also suitable for making base plates for wax-ups and bite templates.

The Cavex LC Dental Tray offers various benefits, among which its extra-wide shape.

Consequently, the hassle with sticking up pieces belongs to the past. Furthermore, the processing is simplified as the material can be cured with halogen and UV. Once properly cured, the material is dimensionally stable.

Features

- Light-curing tray material
- Curing time with halogen or UV: 3 to 5 minutes
- Extended width
- Three-year shelf life
- Fifty sheets per unit

Art. Nr.	Description	Content
BP010	Cavex LC Dental Tray	50 pcs

CAVEX INDIVIDUAL TRAYS

The Cavex Individual Tray is a gray-colored tray with a standard thickness of 1.9 mm. It guarantees an optimal fit even when the spoon is stored for a longer period. Fast processing and a favorable price/quality ratio are reasons why the Cavex Individual Tray has been popular in dental laboratories all over the world for many years.

Features

- Simple technique
- Rapid processing
- Dimensionally stable
- Cost-efficient
- Standard thickness of 1.9 mm

Art. Nr.	Description	Content
BL006	Cavex Individual Trays uppers	100 pcs
