

IN THE PERFECTION
OF A DIAMOND LIES
THE LIGHT OF YOUR SMILE

DIAMOND WHITENING LUXURY
SUPERIOR WHITENING TECHNOLOGY

CURASEPT
FIRST BECAUSE WE CARE

A bright white smile is the symbol of well-being that goes beyond aesthetics; it's a way of feeling good and ready for the world.

This is why Curasept created **Diamond Whitening Luxury**, a superior whitening toothpaste that works through the effectiveness of an exclusive formulation.

With Diamond Powder, Peroxydone, Hyaluronic Acid, and Substituted Hydroxyapatite, it acts on discolorations, protects and strengthens the enamel and gums.

Whiter, More Protected.

ACTS ON TOOTH DISCOLORATION

ABSORBS PIGMENTING SUBSTANCES

PROTECTS AND STRENGTHENS ENAMEL

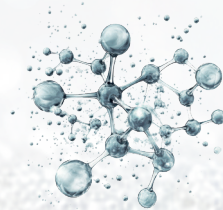

DIAMOND POWDER

Diamond powder has a smoothing effect on the enamel that helps remove stains.

PEROXIDONE

Peroxidone is capable of releasing active oxygen slowly and penetrating the enamel prisms, effectively acting on tooth discoloration with a long-lasting effect.

HYDROXYAPATITE and FLUORIDE SALTS

Substituted hydroxyapatite, combined with chitosan together with the fluoride concentration, performs a remineralizing action that helps to strengthen and reduce enamel imperfections.

HYALURONIC ACID and DNA/RNA

Hyaluronic Acid has a protective effect, enhanced by plant-derived DNA/RNA.

THE RESULTS?

A WHITE, BRIGHT, HEALTHY SMILE AND AN ANTI-AGING ACTION ON THE GUMS.

RDA: 76
Bright mint
1450 ppm F⁻

Expo Display
